PROFESSIONAL SUMMARY

B.Tech CSE undergraduate (2027) with a strong foundation in Data Structures & Algorithms, OOP, DBMS, and OS, plus hands-on full-stack development experience using the MERN stack. Built and deployed multiple production-oriented projects end-to-end, from API design to live deployment. Passionate about writing clean, maintainable code and solving real-world problems, and actively seeking entry-level software engineering opportunities to contribute to impactful, engineering-driven teams.

EDUCATION

B.Tech in Computer Science and Engineering *2023 – 2027*
Sr. Institute of Management and Technology, Lucknow

INTERNSHIP EXPERIENCE

Web Developer Intern — Codec Technologies Pvt. Ltd. *Jun 2026 – Jul 2026*

- Completed a 1-month AICTE & ICAC approved internship program as a Web Developer Intern, contributing to web development tasks under professional mentorship.
- Demonstrated strong problem-solving ability, technical skill, and initiative, receiving a formal Letter of Recommendation for exceptional performance and dedication.
- Collaborated within a professional engineering environment, applying full-stack development concepts to real project tasks.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, Java
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, OS, Low-Level Design
- **Tools & Platforms:** Git, GitHub, Docker (Basics), Postman

PROJECTS

NepCart | MERN Stack · React.js · Node.js · MongoDB *Jul 2026*

- Built NepCart, a full-stack e-commerce web application enabling product browsing, cart management, and order flow with a responsive user interface.
- Designed RESTful APIs and a MongoDB-backed data layer to handle products, carts, and orders reliably.
- Deployed the live application (npcart.vercel.app), handling end-to-end development, testing, and deployment.

Live: Nepcart

Climate Intelligence Hub | React.js · Python · JavaScript · HTML/CSS *March 2026*

- Built an AI-powered climate change predictor platform enabling users to query real-time weather insights and AI-generated environmental forecasts.
- Architected event-driven climate workflows to handle weather events and stream AI responses efficiently.
- Designed a fully responsive and accessible UI using React.js with a focus on usability and performance.

Live: climatepredictor | GitHub: climate-change-predictor

Fake News Detector | MERN Stack · REST API *November 2025*

- Developed a full-stack fake news detection platform using MongoDB, Express.js, React.js, and Node.js (MERN) with role-based access control for admins and users.
- Engineered scalable REST APIs with modular architecture, centralized error handling, and clean code principles — processing news validation requests reliably at scale.
- Implemented predictable global state management, reducing component prop-drilling and improving frontend maintainability.

GitHub: fake-news-detector-1

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved 225+ problems on LeetCode, covering topics including arrays, trees, graphs, dynamic programming, and binary search.
- Participated in IIT Kanpur Engineers' Conclave — one of India's leading technical student conclaves.
- Active participant in college-level hackathons and technical coding competitions.

CERTIFICATIONS

- Oracle | 2025 — Generative AI
- Deltaware Solutions | 2025 — Java Spring Boot
- KG Coding | 2025 — HTML & CSS
- 2025 — Engineers' Day — College Level Recognition
- DSA – pwskills – 2026

LEADERSHIP & COMMUNICATION

- Served as School Captain for two consecutive years, leading student initiatives, events, and inter-team communication.
- Strong communicator through debates and presentations; experienced with code reviews and iterative team workflows.
